

## REMARKS/ARGUMENTS

This amendment is submitted in response to the office action mailed June 30, 2004. Reconsideration is respectfully requested.

Claims 1-9 were examined. Claims 1, 2, and 4-7 were rejected as anticipated by US 4,282,555 – Svedberg. Claims 3, 8, and 9 were held to define patentable subject matter, but were objected to as depending from rejected claims.

In response, claim 1 has been amended to incorporate the patentable subject matter of claim 3. Claims 4-7 have been amended to depend from claim 1. New claim 10 has been added to present the patentable subject matter of original claim 8 in an independent claim. New claim 11 has been added to present the patentable subject matter of original claim 9 in an independent claim. Claims 2, 3, 8, and 9 have been canceled as superfluous.

Accordingly, it is respectfully submitted that claims 1, 4-7, 10, and 11, as amended, are allowable.

The drawings were objected to on several grounds. Specifically, the Examiner required that Figures 1 and 2 be labeled “PRIOR ART.” In addition, it was pointed out that the reference numerals “20c”, “32c”, “34c” and “38”, called out in the specification, were not shown in the drawings as filed. These objections have been addressed in the replacement drawing sheets submitted herewith, as explained above.

The Examiner also objected to the omission of drawings illustrating the subject matter of original claims 8 and 9, as filed. Accordingly, new drawing sheets are submitted herewith, which include new Figures 5 and 6, respectively illustrating the subject matter of original claim 8 (now incorporated in new claim 10) and of original claim 9 (now incorporated in new claim 11). The specification has been amended to make specific reference to the new drawing figures. No new matter has been added.

Finally, the title has been amended, as requested by the examiner, which accurately and concisely describes the invention as an “Overvoltage Protection Device”.
